                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       NESCUL 1430-813-781-49/C

Sequence 49, Application US/09813781

Sequence 49, Application US/09813781

Patent NO. 6405989

GENERAL INFORMATION

APPLICANT: WEIDANZ, JON A.

APPLICANT: WEIDANZ, JON A.

APPLICANT: WONG, HING C.

TITLE OF INVENTION: FUSION PROTEINS COMPRISING BACTERIOPHAGE COAT PROTEIN

TITLE OF INVENTION: AND A SINGLE-CHAIN T-CELL RECEPTOR

FILE REFERENCE: 46745(1758)

CURRENT APPLICATION NUMBER: US/09/813,781
                                                                                                                                                                 FATERITY NO. 67 APPLICATION US/09038073

Sequence 3075, Application US/08584040

Patent No. 6346398
GENERAL INFORMATION:
APPLICANT: Paveo, Pamela
APPLICANT: Richcomb, Dan T.
APPLICANT: Escobedo, Jaimes
APPLICANT: Genoration: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCE ADDRESS:
ADDRESSE: Lyon & Lyon
STREET: Suite 4700
CITY: Los Angeles
STATE: California
COUNTRY: U.S.A.
ZIP: 90071-2066
COMPUTER READABLE FORM:
MEDIUM TYPE: 35" Diskette, 1.44 Mb
MEDIUM TYPE: 35" Diskette, 1.44 Mb
MEDIUM TYPE: BECOMPUTER: NEADABLE FORM:
MEDIUM TYPE: BECOMPUTER: NOTHERICATION DATA:
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/584,040
FILING DATE: Jaimany 11, 1996
FILING DATE: SILAR
COUNTRY: USA

ZUP: 98104-7092

COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: EN PC Compatible
COMPUTER: EN PC Compatible
COMPUTER: PatentIn Release #1.0, Version #1.30

SOFTWARE: PatentIn Release #1.0, Version #1.30

CURRENT APPLICATION DATA:
RELING DATE: 04-APR-1997

ATTORNEY AGENT INFORMATION:
REGISTRATION NUMBER: 210121.419C2

REFERENCE/DOCKET NUMBER: 210121.419C2

REFERENCE/DOCKET NUMBER: 210121.419C2

TELEPHONE: (206) 622-4900

TELEFRAX: (206) 682-6031

INFORMATION FOR SEQ ID NO: 128:
SERGIENCE CHRARACTERISTICS:

; Sequence 2, Application US/10010717
; Sequence 2, Application US/10010717
; Patent No. 6225183
; GENERAL INFORMATION:
; APPLICANT: Vinayak, Ravi S.
; APPLICANT: Mullah, Khairuzaman B.
; TITLE OF INVENTION: Methods and Compositions for Synthesis of Labelled
; TITLE OF INVENTION: Oligonuclectides and Analogs on Solid-Supports
; TILE OF INVENTION: Oligonuclectides and Analogs on Solid-Supports
; CURRENT PRILING DATE: 2001-11-07
; PRIOR APPLICATION NUMBER: 09/256,340
; PRIOR PRILING DATE: 1999-02-22
; NUMBER OF SEQ ID NOS: 8

Patent No. 607507

GENERAL INFORMATION:
APPLICANT: Regeneron Pharmaceuticals, Inc.
APPLICANT: Regeneron Pharmaceuticals, Inc.
APPLICANT: Regeneron Pharmaceuticals, Inc.
APPLICANT: Regeneron Pharmaceuticals, Inc.
TITLE OF INVENTION: Modified Dorsal Tissue Affecting Factor and Composition
FILE REFERENCE: REG 133
CURRENT APPLICATION NUMBER: US/08/897,236A
CURRENT FILING DATE: 1997-07-17
NUMBER OF SEQ ID NOS: 23
SOFTWARE: Patentin Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö

Sequence 20, Application US/09500253B
Patent No. 6500540
GENERAL INFORMATION:
APPLICANT: Regeneror Pharmaceuticals, Inc.
TILLE OF INVENTION: Modified Dorsal Tissue Affecting Factor and Composition FILE REFERENCE: REG 133-Z
CURRENT APPLICATION WUMBER: US/09/500,253B
CURRENT PLILING DATE: 2000-02-08
NUMBER OF SEQ ID NOS: 27
SOCTWARAR: Patentin Version 3.0
SEQ ID NO 20
LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 20, Application US/09167874
